

TOS800-II

TETRA Desk Console
- Version II -

Application

Are you looking for a compact and functional console to operate your Motorola TETRA radio at your office work places in the administration or operations centre? Here we have the right solution for you: TOS800-II desk console!

The housing of the console which is held in decent colours holds the original Motorola radio control head of your remote mount capable radio set enabling still full access to all functions enhanced by the benefits of inbuilt loudspeakers, PTT button as well as an elegant gooseneck microphone which comes already with the basic version. Options to be ordered are an additional foot PTT, a handset as well as a headset for discrete communication and - in combination with ATS Remote Expander - remote operability of the Motorola radio device up to a distance of 1,000 m.

Technical Specification

- Operation of a remote Motorola subscriber of the series: MTM5200 / MTM5400 / MTM800 FUG / Motorola ET [ET-version: P/N 93870030 (see below) as well as Motorola firmware version MR15.1 required]
- CAT jack to extend the remote use of the radio set's control head up to 1,000 meters using TOS381
- Remote extension via standard CAT 7 cable.
- Inbuilt loudspeaker (disconnectable)
